**Current Report No. 19 / 2021**

The Management Board of ULMA Construcción Polska S.A. (the Company) announces that given to higher sales revenues on export activities in the “construction services” segment the expected financial result for the fourth quarter of 2021 will be significantly higher than the result recorded in the corresponding period of the previous year.

Revenues from export activities are related to the process of optimizing the use of equipment on the local market in Poland and its movement within the global commercial structures of the Group. These transactions are of occasional nature.

This has had a significant and positive impact on the financial results reported in the entire Q4 2021 of both the Company, and the Group.
